

Tasin Bin Tareq

Full-Stack Software Engineer · AI & Automation · Mobile & Web

tasindevx@gmail.com | github.com/Rayan37307 | +8801602179536 | Bangladesh

PROFESSIONAL SUMMARY

Software Engineer with hands-on experience across the full product lifecycle — from React Native mobile apps and Next.js/Express web platforms to FastAPI backends, WordPress sites, and AI-powered agentic workflows. Comfortable switching between frontend polish, backend architecture, and automation pipelines. Maintains 120+ public GitHub repositories and has shipped production systems for eCommerce, travel, and social media management.

EXPERIENCE

Software Engineer & AI Automation Specialist · [Xenon Studios](#) 2026 – Present

- Build and maintain full-stack web applications using React, Next.js, and Express.js with RESTful API design
- Develop AI-powered automation pipelines and agentic workflows integrating OpenAI and Anthropic APIs into production backends
- Engineer FastAPI / Python microservices for data processing, lead generation, and business automation at scale
- Design and deploy WordPress solutions with custom theme and plugin development for client projects
- Create React Native mobile applications with cross-platform support for iOS and Android

PROJECTS

LeadFly — *AI Lead Automation Platform*

- Full-stack lead generation platform — FastAPI backend, React frontend — automating prospect discovery and qualification across data sources
- Built agentic workflows that autonomously search, enrich, and score leads, enabling agencies to scale outreach without manual effort

Lingo — *Interactive Language Learning Platform (Duolingo Clone)*

- Built a full-stack language learning app with Next.js 15, TypeScript, Drizzle ORM, and Neon PostgreSQL — featuring lesson flows, challenge progression, and a hearts/lives system
- Integrated Clerk authentication with role-based admin panel (react-admin) for managing courses, units, and challenges via a REST-backed dashboard
- Implemented Stripe-powered subscription system for pro tier access, quest tracking, and an in-app shop with Zustand state management

OmniGuard — *Omnichannel AI Social Media Manager*

- Developed a Next.js + FastAPI system for simultaneous monitoring and management of multiple social media platforms
- Designed an AI-driven response engine with brand monitoring, sentiment analysis, and automated engagement features

WishCare BD — *Full-Stack eCommerce Platform*

- Built end-to-end eCommerce solution with React frontend, Express.js backend, and integrated payment gateway
- Optimised database schema and API response times for high-traffic operations; deployed on cloud infrastructure with CI/CD pipelines

Innovist BD — *Multi-Vendor eCommerce Marketplace*

- Engineered multi-vendor architecture with dedicated seller dashboards, admin controls, and automated commission management
- Delivered a high-performance React frontend with dynamic product discovery, real-time inventory tracking, and multi-step checkout

Yoom — *Realtime Video Conferencing Platform*

- Built a full-featured video conferencing platform with Next.js and the Stream Video SDK, supporting HD real-time calls for multiple concurrent participants
- Implemented in-call features including meeting recording, live chat/messaging, screen sharing-ready room architecture, and personal meeting room links

- Engineered auth and room management with secure session handling, invite-based access control, and a dashboard for upcoming and past meetings

TZS International — *Travel Agency Digital Platform*

- Designed and built responsive WordPress website with custom booking system, service management, and modern UI/UX
- Integrated third-party APIs for availability checking and reservation management

TECHNICAL SKILLS

Languages: JavaScript (ES2022+), TypeScript, Python, SQL, PHP

Frontend: React, Next.js, React Native, Tailwind CSS, HTML/CSS

Backend: Node.js, Express.js, FastAPI, REST APIs, GraphQL

AI & Agents: Agentic Workflows, LangChain, OpenAI API, Anthropic API, Workflow Automation

CMS & Other: WordPress (custom themes & plugins), Shopify

Tools: Git, GitHub, Docker, CI/CD, Vercel, Cloud Deployment, Figma

ACHIEVEMENTS

- Maintain 120+ public GitHub repositories spanning AI experiments, automation tools, mobile apps, and full-stack web projects
- Shipped multiple production-grade systems — eCommerce platforms, social media tools, and AI pipelines — used by real businesses
- Active open-source contributor; early adopter of agentic AI patterns in production applications
